

eMenuCHOICE®

Transforming Dining for Senior LivingSM

Transforming Dining for Senior LivingSM

eMenuCHOICE® is a web-based point of service (POS) application for senior living dining designed to eliminate communication barriers while enabling person-centered choices, maximizing accuracy, and streamlining kitchen operations.

The tool empowers residents to participate in a key activity of daily living: choosing what to eat for their meals. It also streamlines dietary management across the organization from the food service side of operations. eMenuCHOICE® has proven successful in resident satisfaction and operational streamlining and cost savings.

Unlike traditional point of sale systems, eMenuCHOICE® was built specifically to meet the complex needs of senior living communities serving the full continuum of residents.

Designed **by** a senior care provider **for** senior care providers, eMenuCHOICE® delivers value and a first-class dining experience for everyone.

Transforming the meal-ordering process for senior care providers

eMenuCHOICE® is a robust application that breaks down communication barriers, streamlines workflow and increases efficiency, simplifies menu management, and more. The versatility of the application and multiple options for serving processes, such as pre-ordering and restaurant-style, allows for use in both skilled nursing and senior housing and assisted living settings. This easy-to-learn, easy-to-use, and highly customizable tool:

- **Promotes choice** and greater satisfaction by engaging residents in meal ordering and evaluating menu items
- **Improves communication** among residents, servers, and kitchen staff
- **Streamlines meal ordering** and fulfillment processes for both frontline and kitchen staff
- **Increases efficiency** by using mobile technology for real-time ordering and updates

Real Choice in Their Hands. Greater Control in Yours.

How eMenuCHOICE® enhances the dining experience for everyone:

Promotes Resident Choice

- Expanded menu options, individual food preferences, and a food-rating system empowers resident choice and ensures greater satisfaction.
- Simple photos with descriptions and optional audio descriptions make it easy for residents to understand meal options and ensures clear communication among staff and residents.
- Family members may securely access eMenuCHOICE® online to assist in ordering menu selections for a resident challenged with independent menu choices.

Improves Staff Efficiency & Care Delivery

- Flags for food allergies, intolerances, and diet restrictions prevent order mistakes for resident health and safety.
- Touchscreen ordering technology transmits orders to the kitchen electronically, saving time and reducing mistakes caused by handwritten tickets.
- Technology allows for real-time order transmission, changes, and updates to the kitchen, reducing waste and expense.

Simplifies Administration

- Menu management is made simple, featuring over 600 preloaded menu items, with options to build custom menus, plan and schedule ahead in just a few clicks.
- Simplifies complex billing environments by supporting a la carte dining while providing standard per meal or all-inclusive charge options, allowing staff to focus on residents—not on their charge plan. Offers flexible payment options including bill to account and pay by credit card or meal credits and no charge at all.
- Automated billing and report generation simplifies work and saves time.

"Sometimes I don't recognize the names of some foods. The pictures help me decide what to eat."

—Lila, Resident at skilled-nursing center in Minnesota

"Everyone required minimal training because it's so easy! ... The cooks are thrilled—they are getting tickets (in) real time as opposed to a stack of handwritten items all at once."

—Tara S., Financial Analyst at assisted living community in Texas
